Sayed Samy Shalan

Mobile Team Lead | Flutter & Android Architect

Maadi, Cairo, Egypt | +20 112 020 7774 | sayedshalan22@gmail.com | linkedin.com/in/sayed-shalan | github.com/Sayed-Shalan

PROFESSIONAL SUMMARY

Mobile Team Lead and Flutter & Android Architect with 9+ years building and scaling high-performance cross-platform applications. Lead a team of 12 engineers across 30+ Flutter, Android, and iOS projects, owning mobile architecture, system design, code reviews, mentoring, delivery, and stakeholder communication. Expert in Clean Architecture, modular/feature-first design, performance optimization, and CI/CD. Champion AI-assisted development and AI feature integration, shipping production fintech, government, e-commerce, and healthtech apps to the App Store and Google Play.

CORE COMPETENCIES

Technical Leadership, Mobile Architecture, System Design, Team Mentoring, Code Reviews, Delivery Ownership, Stakeholder Communication, Agile / Scrum, Flutter, Android, iOS, CI/CD, Clean Architecture, AI Integration.

TECHNICAL SKILLS

Leadership & Delivery: Technical leadership, team mentoring, code reviews, delivery ownership, stakeholder communication, Agile/Scrum, roadmap planning, technical decision-making

Architecture & System Design: Clean Architecture, modular & feature-first architecture, SOLID, design patterns, dependency injection, reusable components, scalability, maintainability

Mobile Development: Flutter, Dart, Android (Kotlin, Java, Jetpack), iOS, cross-platform development

State Management & DI: BLoC, Cubit, Riverpod, Provider, GetX, GetIt, Injectable

Backend Integration: REST APIs, GraphQL, Dio, Firebase (FCM, Firestore, Realtime DB, Analytics), Pusher, Socket.io, Signal-R

AI & Modern Engineering: AI feature integration, AI-assisted development (Claude Code), Anthropic API, Model Context Protocol (MCP), agent skills

CI/CD & DevOps: fastlane, GitHub Actions, GitLab CI, Azure Pipelines, Codemagic, Docker, build flavors, FVM, Mason, Shorebird, SonarQube, DevLake, Grafana

Performance & Security: DevTools profiling, memory management, rendering/jank optimization, app-size/tree-shaking, SSL pinning, obfuscation, root/jailbreak detection

Native & Testing: Native Android (Kotlin/Java), platform channels, Pigeon; unit, integration, and UI testing

PROFESSIONAL EXPERIENCE

Mobile Team Lead

Beetleware | Apr 2023 – Present

- Lead and mentor a team of 12 mobile engineers across 30+ Flutter, Android, and iOS applications, owning mobile architecture, code reviews, and release quality.
- Define system design and architecture standards (Clean Architecture, feature-first modularization, SOLID, design patterns) and standardize state management (BLoC/Cubit, Riverpod, GetX) and dependency injection (GetIt, Injectable).
- Drive technical decision-making, roadmaps, and stakeholder communication, translating business goals into scalable, on-time deliverables.
- Architected and delivered flagship apps from scratch — Watheeq Financial, SoumTech, and 01Gov — with payments, NAFATH/OTP security, real-time (Pusher), and AI feature integration.
- Introduced AI-assisted development workflows (Claude Code) and integrated AI-powered features into products, improving delivery speed and product capability.
- Established CI/CD pipelines (fastlane, GitHub Actions, GitLab, Codemagic) and code-quality gates (SonarQube); track delivery and quality metrics with DevLake and Grafana.
- Contribute hands-on to backend development (PHP/Laravel) and DevOps practices.

Flutter Team Lead

Web7soft | Apr 2023 – Jun 2024

- Led a Flutter team delivering 8+ cross-platform applications for US-based clients, owning architecture, code review, and timely releases.
- Mentored engineers on Clean Architecture and state-management best practices.

Flutter Team Lead

More-creatives | Nov 2020 – Apr 2024

- Led delivery of 14 cross-platform apps for Android and iOS, from architecture through App Store and Google Play release.
- Established reusable, maintainable component architecture and mentored the team.

Senior Android Developer

Hitchhicker | Oct 2019 – Nov 2020

- Developed the Hitchhiker and ReTag native Android applications (Kotlin/Java), owning feature delivery, performance, and release.

Senior Mobile Developer

Wimo | Jan 2019 – Oct 2019

- Built 5 shipping and logistics applications covering the full logistics cycle using Flutter and Android.

Android Developer

KWN-Digital | Feb 2018 – Jan 2019

- Delivered 2 e-learning applications for the Omani government.

Android Developer

Swever | Jun 2016 – Feb 2018

- Developed the Swever e-commerce application from requirements through Google Play release.

KEY PROJECTS

- **Watheeq Financial (Fintech) —** Led architecture and built from scratch a cross-platform financial-services app (account opening, investment management, investment opportunities). Flutter, Clean Architecture, Cubit, GoRouter, payments; Android and iOS.
- **SoumTech (Online Auctions) —** Delivered a licensed online auction platform (Saudi Entrustment & Liquidation Center) end to end, with NAFATH national-ID + OTP authentication, payments, and Pusher real-time updates. Flutter, Clean Architecture, Cubit; Android and iOS.
- **01Gov (GovTech + AI) —** Built from scratch the official government-innovation knowledge platform with subscription e-payments and AI-assisted features; 1,000+ downloads. Flutter, BLoC, Clean Architecture, GoRouter, AI integration; Android and iOS.
- **Tal3eeb (Gaming / AR) —** Led the team and architected a cross-platform gaming app featuring Augmented Reality (AR). Flutter; Android and iOS.
- **Rfah (HealthTech) —** Led the team and delivered ~85% of a telehealth counseling platform (bookings, assessments, 24/7 consultations). Flutter, Riverpod, Stripe payments, Mason, Shorebird; Android and iOS.
- **Mihwar (Lifestyle / Discovery) —** Led delivery and code reviews for a discovery platform for venues, events, and brands across Saudi Arabia. Flutter, GetX, Clean Architecture; Android and iOS.

Additional Applications: Wimo Ship, Swever, Hitchhiker, ReTag, Zahi, Khairumma, Hitclinic, Plans, Shipper, Vidume, Property Filter, Meat&Eat, Sporting Qatar, Foodyz, Agzakhanh, SBA-Academy.

EDUCATION

B.Sc. in Computer Science

Benha University | 2013 – 2017

Grade: Very Good (83%); Excellent grade in Graduation Project.

DevOps Internship

Beetleware | May 2025 – Sep 2025

CI/CD pipelines, Docker, automated deployments, cloud integration, and release management.

CERTIFICATIONS

Leadership & Professional Development

- Leadership Program — Beetleware (Jan – Apr 2026)

AI & Modern Engineering (Anthropic)

- Claude Code in Action — Anthropic (2026)
- Claude with the Anthropic API — Anthropic (2026)
- Introduction to Model Context Protocol — Anthropic (2026)
- Introduction to Agent Skills — Anthropic (2026)

Mobile Development

- Mobile Application Launchpad (MAL) — Google | Udacity (2016 – 2017)
- Advanced Android Training — Holol (2025)
